### AN IMPORTANT MEETING

Under the auspices of Vulcan Agricultural Society a public meeting will be held in Odd Fellows' Hall on Wednesday, March 27th for the purpose of reorganizing the society. Major Strang, president of the Alberta Seed Growers' Association, will be present and will outline the various activities that may be taken up by such a society. Mr. Seymour, town planning expert for the provincial government will also address the meeting. A good attendance from both town and country is particularly requested.

This meeting, which is also under auspices of the Vulcan Board of Trade, will commence at 2.30 p.m.

### OBITUARY

PHYLLIS O'DWYER

It is with much regret that we have to record the death of Phyllis, daughter of Mr. and Mrs. P. J. O'Dwyer of Ensign, which took place on Friday, March 8th, from complications following scarlet fever.

The funeral took place on Monday, March 11th, Father Bowlin of Brant conducting the ceremony, and interment was made in Brant cemetery.

Mr. and Mrs. O'Dwyer have the sympathy of the community in the loss of a bright and popular daughter especially so as they lost another daughter from similar causes only about a month ago.

Many floral tokens of regret and sympathy were received, among them being those from: Community; Daddy, Mamma, Grandma and Baby; Jim Home Grain Co.; Mr. and Mrs. F. L. Swartz and son; Miss McConnell and school children; Mr. and Mrs. J. S. Ferguson; Mr. and Mrs. E. E. Southgate; Mr. and Mrs. Dale Campbell; Mr. and Mrs. Dean Campbell; Ensign Branch of Women's Institute; Mr. and Mrs. T. Bolt; Mr. and Mrs. C. H. Matlock; Catholic Women's League; Mr. and Mrs. Harris; Ensign Ladies' Aid; Mr. and Mrs. Jack Phillips.

### CHURCH OF CHRIST NOTES

Well, the meeting is on. There have been fine interest and good audiences for the condition of the roads. We will continue over two Lord's Days, so get ready to attend. Next Lord's Day evening we will present the same subject we should have presented March 17, but because of the weather conditions, many who wished to hear it could not be present so we spoke from another subject and held this one for March 24th. What the people of the Church of Christ stand for as regarding their religious position. Now for the week beginning March 24th we will present upon Sunday evening "Our Earnest Contention," Monday "The Unpardonable Sin," Tuesday "Christ Seeking the Lost," Wednesday "Redemption Through Christ," Thursday "The Evidence of Pardon," Friday "The Worth of a Soul." This is the strongest appeal we can make to the human heart. If you have any interest in the salvation of your soul come and listen in. Good music always. Public invited.

### VULCAN OILS BUSY

The head office of Vulcan Oils Limited, at Vulcan, has been a very busy place for the last three weeks, dealing with the applications for allotment of shares, and officials are well satisfied that the company is now assured of ample funds to carry on drilling operations by which they hope to make No. 1 well a steady producer.

The directors have recently made arrangements with Mr. Clarence Snyder to continue in his capacity of driller, and are confident that the well will be cleared out, and will be put on a steady producing basis, the normal output being 100 barrels per day when producing.

### STARTING THIS WEEK

Oil stock form the main topic of conversation around town these days and, naturally, Vulcan Oils Limited, is to the fore as a subject for these discussions.

It is interesting to reprint the following from Monday's Calgary Herald: Arrangements have been completed for Clarence Snyder to take charge of the drilling programme of the Vulcan Oils, Ltd., and work will commence immediately at the Vulcan No. 1 well. A. J. Flood, secretary-treasurer, announced to The Herald Saturday morning.

Mr. Flood stated that work would be started at once to clean out the Vulcan No. 1 well. The company has been fully financed to carry development forward steadily, he added. The capital of the company was raised recently from \$250,000 to \$500,000, but only part of the additional issue of capital stock has been sold.

The snowfall on Saturday evening was "just what the country needed," and local farmers are now optimistic as to early seeding and crop prospects.

## ASSOCIATION WILL FOSTER ALL ATHLETICS

A public meeting was held in the Memorial Hall on March 14th for the purpose of discussing the organization and supervision of the different branches of sports and recreation in the town. Mayor Butchart called the meeting to order and asked for the election of a chairman. It was moved by Dr. Carson and seconded by Mr. L. F. Dawson, E. G. McPherson and R. L. Elves, and presented the following resolution, viz: That this meeting go on record as being in favor of forming an association to be known as the Vulcan Athletic Association; that the association foster all branches of sport, excluding golf, under the supervision of a competent supervisor or instructor whose duties should include physical training for the old and young. This resolution led to a lengthy discussion, and many questions were put to the committee. These brought out the information that no plans for financing had been made and no one was in view as instructor. Representatives of different branches of sport were present and spoke in favor of the resolution. Finally it was moved by Mr. W. A. Howes and seconded by Mr. C. R. Robson that this meeting go on record as being in favor of forming an association to be known as the Vulcan Athletic Association. This was presented as an amendment to the previous motion and was carried almost unanimously.

Election of officers of the Association was next in order and after lengthy discussion it was decided that the best way was to elect a committee to have charge of the affairs of the Association. This was moved by Dr. Carson and seconded by Mr. F. L. Sibington and carried. The following committee was elected, viz: Messrs. Errett King, E. G. McPherson, W. E. Butchart, G. C. Collier and R. L. Elves. The chairman then asked the meeting to state what should be the scope of the activities of this committee. It was the general opinion that all such matters and the method of financing should be left to the committee. Mr. W. A. Howes suggested that we draw up by-laws for the Association and submit them to a general meeting for approval.

### C.G.I.T. CONFERENCE HERE

Mabel McPherson of Vulcan Elected President of the First Conference for C. G. I. T. in Vulcan

Under the auspices of the Girls' Work Board of Alberta, which Miss Mabel Nix, B.A., is secretary, a series of fourteen conferences of Canadian Girls in Training throughout the province were arranged for fall and winter months and are being successfully carried out.

Friday night found over 100 girls gathered together in the United Church from Blackie, Milo, Champion, Carmangay, Union Jack, Red Cross and Vulcan. Miss Nix was in charge and the local arrangements were very skillfully carried through, by the local groups under the efficient leaders, Mrs. T. Lebeau, Miss Verna Graham and Miss Minnie Holmes.

The conference opened with the registration of delegates followed by a sing song led by Miss Nix in which all the girls took part. The election of officers for the year was then taken up in order which resulted in Mabel McPherson of Vulcan, being elected president and Aileen McCullough of Champion, secretary.

"Taking your soul on a pilgrimage" was the subject of Miss Nix's opening address to the delegates. The remainder of the evening was occupied in outlining topics for Saturday morning's session.

Saturday morning found the delegates gathered together in their different groups discussing such questions, as, immigration and world peace, vocations, amusements, or the use of spare time, what it means to join the church, and other questions of great importance to teenage girls.

Miss Bond of Champion who had charge of the morning devotional period told an interesting story of the "girl who is true."

Through the kindness of the Great War Veterans, their fine new memorial hall and gymnasium was placed as to early seeding and crop prospects.

(Continued on Back Page)

### VULCAN TENNIS CLUB

A meeting of the above club will be held on Monday evening next, March 25th, at the home of Mr. W. H. Scott. Members and prospective members are cordially invited to attend.

### BOXING

The Legion promoters have arranged for the meeting on Saturday, March 30 of Louis Kwiczak, Drumheller and the local boy, Frank Jackson, in a ten round bout. Kwiczak got a decision over Jackson at Drumheller last month. Other boys are being lined up and the card will be up to the standard already set by the local promoters.

### IN AND AROUND THE CLUB

There's an outbreak of oil fever in the Club as elsewhere. Hope we all make lots of "jack" this time.

We hear our Lady Member is going to commit matrimony at an early date. Here's wishing you in a lifetime of happiness Nell.

We are progressing in the Sports Organization. We now have a good committee. Watch them work.

Har Charlie got your subscription to the "Legionary" yet? You'll get your money's worth boys.

Theron Vaughn is in the finals and there's more than an outside chance of this boy bringing the Championship to Vulcan. He will give them a boxing lesson anyway.

Cowie and Rathwell are busy fighting in the newspaper columns. Wait till the ice goes out and they can do their scrapping right here.

We had the C.G.I.T. girls in the "gym" on Saturday afternoon. Judging by the merriment a good time was had.

Mr. George Coville of Red Deer was a Vulcan visitor last week, calling on his old time friends and, incidentally, securing his quota of Vulcan Oils stock.

### ST. ANDREWS CHURCH

Holy Week services will be conducted by Rev. Father Green in St. Andrews' Catholic Church Vulcan, from Thursday morning, March 28th, until Easter Sunday.

The services will begin with the Holy Sacrifice of Mass at 10 a.m., on Thursday. After the mass the Blessed Sacrament will be placed in the repository on a special altar, where the faithful will keep vigil thro the day and night. On Thursday evening at 7.30 a sermon will be preached on the "Christ's Last Will and Testament."

Friday at 10 a.m., Mass of the pre-sanctified. Veneration of the Cross during the day. At 3 p.m. commemoration of the three hours agony and death of Christ on the Cross. At 7.30 p.m., sermon.

Saturday 9 a.m., reading of the prophecies followed by the various blessings and family mass. Saturday, 7.30 a.m., sermon.  
Easter Sunday, mass and sermon 11 a.m.

### WOMEN'S INSTITUTE DANCE

A wonderfully successful old time dance was held in the Odd Fellows' hall on Friday 15th. A very good crowd was in attendance. Bird's Red Birds supplied the music, which was good and peppy. The dance was held under the auspices of the Vulcan W. I. and a delicious supper was served at midnight.

### CATHOLIC WOMEN'S LEAGUE

The whist drive under the auspices of the above society held last evening was in every way a success. A good crowd was present the dainty and plentiful refreshments were much enjoyed and the prize winners were: ladies' first, Mrs. Dave McIntyre, ladies' consolation, Mrs. Bambrick; gent's first, Mr. Joe Gerding and gent's consolation Mr. Albert Markert.

### COUNCIL OF ROYAL MEETS

The first meeting of the new council of the Municipality of Royal, the personnel being the same as the former council, took place in the Municipal office on Wednesday last.

Mr. Alex. Smith, Reeve, presided; Messrs. J. Eamor, deputy reeve and A. J. Flood, secretary-treasurer, being among those present.

The matter of roads was discussed at some length, and an announcement of the proposed program in this connection may be expected later.

A new 12 ft. grader for the northern part of the municipality has been purchased, and arrangements were made for the grading crew for the coming season.

Councillor J. D. Lundgren and the secretary were appointed delegates to the Hall convention, at Calgary on March 20th.

## An Outstanding Example of United Effort

**CHEVROLET FISHER BODY GENERAL MOTORS**  
Combined to produce this Car

NO single organization could have produced such a car as this Outstanding Chevrolet . . . or offered it at such a sensationally low price.

It is an outstanding example of the results of united effort.

The vast resources of Chevrolet, Fisher Body and General Motors were brought to bear on the problem of bringing six-cylinder quality, performance and prestige into the field of the low-priced car.

And the result is the Outstanding Chevrolet of Chevrolet History . . . a car of beauty and engineering excellence . . . a Six, in the price range of the four.

You do not know car values until you have inspected this amazing Chevrolet. C-10-2-25C

—a Six in the price range of the four!

#### ALL CAN HELP

In another column will be found reference to a meeting held last week for considering the formation of some central body for the supervision and encouragement of athletics in this town.

The decision of this meeting will inaugurate a distinct forward move for Vulcan, as the association now in course of formation will do much for every branch of sport here and so help to foster a true community spirit.

In this connection it is good to remember that we should work for and with our home town. Beautify it. Improve it. Help make it the kind of town that we really want to live in.

Towns get reputations as well as men. Clean up vacant lots and plant them in gardens. Cut the weeds, clean the streets, and fix the sidewalks. Wash the store windows and pay your taxes without grumbling so that they may give the best possible service back to you.

Our town should be one where folks are friendly, where progressiveness is appreciated, where good roads make it accessible, where proper sanitary methods are conducive to healthfulness, where attractiveness is considered an asset, where education fits for the future, where recreations are plentiful for all, where government is efficient and popular, where living conditions are good, where the helping hand is extended to the unfortunate, where employment is plentiful, where investments are sound and where intolerance is unknown.

That's the kind of a home town that we want, and one way to assist in achieving this desirable end is to get behind Vulcan's Amateur Athletic Association under whose auspices it is hoped the rising generation will be fitted for fine citizenship and those of us who are past the youthful stage will be benefitted by some form of exercise and inspired by watching the progress of those who are soon to take our places.

The right to construct and operate a toll highway from Calgary to Banff, was snowed under in the Legislature by a strong government majority. A group of southern financiers wished to launch this undertaking.

#### ARE TOWNS THE SAME?

The newspaper man sits in his office surrounded by billowing clouds of exchange papers. Small town and big town papers from far and near! And as he reads, he wonders (1) whether after all, there are very few words in the language, or (2) whether all little towns and big towns up and down the country are doing practically the same things. Every paper reports "successful banquets," "record attendances," "unusual enthusiasms." Every town has amateur plays which "produce exceptional talent." Every program is "punctuated with applause from start to finish." It is appalling how many fine citizens are on the move and whose loss is "deeply deplored." Practically all young couples on the eve of wedlock are "amongst the most popular of our young people." Every speaker has "a real message." Almost all undertakings show "strong community spirit." And as for hockey games! They are "probably the best and cleanest which the town has seen this season." The words roll along, roll along.

Yet without these words, where would the newspapers be? It is the vocabulary commonly used to describe certain situations and incidents. People expect it. Newspaper people see only through rose-hued glasses. They have to in order to struggle along. Would the public stand for cold grim facts? It would not, unless they were facts about the other fellow. And after all, these current phrases are fifty per cent—more, seventy-five per cent true. Surely if ever a young couple are "most popular" it is on the eve of their marriage. And after all the loss of any reasonably good citizen is "deeply deplored." Maybe he was an extra good neighbor. To the interest of local eye a fairly good amateur performance does show "unusual talent."

Bouquets are pleasanter than brick bats and as a rule, convey more nearly the real sentiment of people generally. No newspapers will continue along the same old lines, playing up happy events, ignoring unpleasant ones, and seeing everything on a slightly magnified scale. But occasionally the exchange reader wishes very sadly that there were a million ways at his disposal of describing "a successful dance."

#### TO SPEND \$391,507,840 THIS YEAR

The Dominion Government proposes to spend in the next fiscal year, \$31,507,840.00. The big amount goes on Canada's war debt and this obligation will continue for years. \$125,000,000 to cover interest on public debt; \$42,000,000 for war pensions; \$15,600,000 militia and navy needs; \$8,500,000 for agriculture; \$5,300,000 for trade and commerce; \$3,000,000 for post office services, and so on down the list. The Labor department is one outstanding department which will require less than last year.

#### NOTES AND COMMENTS

After all, there is really no need to worry about ex-Presidents, or, for that matter, ex-Prime Ministers. If the worse comes to the worst, they can always make a heap of money by writing syndicated letters for the Hearst press.

Miss Morrow who is engaged to marry Lindbergh, may be a nice girl and all that, but if she really calls him Augustus.

Lloyd George says that if returned to power he will reduce the unemployment problem to normal. But what is "normalcy" in unemployment?

"Unemployment will be reduced to normal when it is confined to the infirm and unsteady."

The Legislature of Quebec turned down woman suffrage by 50 to 16. If we assume that the extension of the suffrage to woman is a mark of Liberalism, then the Legislature of Quebec must be distinctly Conservative.

A Toronto policeman was fired at twice by a young man with a rifle. On being arrested the man gave as his reason for shooting that he had no revolver and wanted one. Another argument for Senator Lynch-Staunton in favor of disarming the police. If this policeman did not have a revolver he would not have been shot at.

In discharging a jury that gave a verdict of which he disapproved the Judge said: "Your sympathies ran away with your judgment and it is a pity your judgment was not a more reasonable one." There was a fine chance for the foreman to talk back and go to jail if need be.

Senator Lynch-Staunton thinks policeman should go unarmed. We always thought the same about bandits.

When you feel that you are beset by trials and vexations, cast thine eyes eastward and think of Hoover.

One of life's disappointments can be avoided by underestimating the time your coal supply will last.

We all say we admire candor in a politician, but its value will never be tested until some party leader says: "Gentlemen, all I ask is delay. I do not want to take one side or the other on this question until after the elections are over."

There is this to be said. Unless our national status is clearly defined, how are we to know when we have a grievance?

Manitoba politicians who bought Winnipeg Electric stock on inside information all lost money. The ticker was inside the inside.

The political leader who treated his friends as potential enemies and his opponents as potential friends was in the same position as nations are today with respect to armament. He is a wise man who can say how the nations would line up in the event of an other general war. For centuries, France was the "ancestral enemy" of Britain, but they fought side by side in the Crimea and in the late war. Britain sided with Frederick the Great, and in 1870 sympathized with Prussia. Botha and Smuts who, with the Kaiser's benediction, fought the British in the Boer War fought with Britain in the Great War. The United States which fought against Britain in 1812-15 was an associate of Britain in 1917-18. Prussia fought and defeated Austria in 1865, but they were allies in 1914. A quarter-century ago, Japan fought Russia but they were allies in 1914-18. In the seventies, the Turks committed horrible atrocities upon the Bulgarians, but they were "pals" in 1916. Really if we only knew whom we had to fight against it might simplify the problem of armamentation.

#### START THE GARDEN

Indoor 'gardening' may be started this month, and the reward will be vegetables considerably earlier than if planted directly in the open. Tomatoes, cabbages, lettuce, melons, even beets, carrots and corn may get an indoor start. For the purpose of gardening on a small scale, something in the nature of shallow cigar box will do, or any shallow box of a size desired. Punch a few holes in the bottom of the box to allow drainage. Break up the good soil used, fine. Moisten the earth and mark off the rows which are 1 inch apart. Sow the seed and cover the top of the box with sacking of burlap. When the seeds have pushed up through the soil, remove the burlap and give them full sunlight. Keep the box back 8 inches from the window. Those who garden on a large scale will make use of the outdoor hotbed.

A man looks for home atmosphere round a hotel and hotel service round home.

#### ST. PATRICK'S DAY

March 17, is the festival of Ireland's patron saint—Saint Patrick. St. Patrick was born in 387 A. D. At the age of 16 he was sold into slavery and for many years tended sheep for his master on the hills of Antrim. At last he escaped and went to sea. Some years later he entered the monastery of St. Martin of Tours, where he studied for several years. Filled with zeal to convert his country from Pagan darkness, St. Patrick returned to Ireland, was pleasing to the king, who allowed him to preach his Christian doctrine. St. Patrick spent years in Connaught and abolished idolatry there. He visited Munster and Leinster leaving behind him churches and Monasteries which gave much employment. He died in Ulster on March 17 465 A.D. and ever since then his memory has been revered by devout Catholics. The achievements with which he is credited were many. He was faced with the hostility of the powerful Druids. At last he was compelled to curse their fertile lands so that they became bogs, their rivers so that they yielded no fish. Finally the earth opened and swallowed the obstinate Druids. He is of course also credited with driving the snakes out of Ireland, and supposed to have taught the national jig. The Shamrock is supposed to be Saint Patrick's sacred plant, the three leaves symbolizing the trinity.

At the second Board of Trade meeting held in Milo on March 11 the proposal of a sub hospital in Milo in connection with Vulcan came up again for discussion. A survey is being prepared to be submitted the Vulcan hospital in connection with the formation of a sub hospital district.

Wonder what luck Jonah had with the Mrs. when he told her that fish story?

## OLD MEN OF FORTY

The comparatively recent policy used by many large plants and corporations of insuring employees by groups is working against older men for the reason that the older a man is, the higher the insurance rate. This scheme which in its conception was very fine in safeguarding employees by insurance, is already presenting flaws. The American Federation of Labor is taking it up, and investigating the status of the workmen of 40 to 45.

The Federation claims that it has data showing that the employers who are carrying group insurance for their employees are steadily adopting the policy of discharging men past forty and hiring young men to keep down the premium charges. It is argued that any scheme which although it may protect a worker's old age, encourages his removal from industry while in the prime of life, is basically unsound. This discrimination, if it exists, against the men of forty, prevents these men from bringing up their children as they would like and is thus handicapping the next generation.

It is argued that the men over forty are doing most of the important work of the world, and in many trades they are much more dependable and efficient. Against this is argued, that older men do not accept the new methods and innovations as easily as the younger ones, and that industry is hampered by their unwillingness or inability to adopt new methods.

Whatever the merits of this argument may be, the workman of forty must be considered, and if group insurance in the hands of the employer, is going to drive the middle aged man from the factory, a solution is offered by which the State may take over this general insurance.

## TURKEY INSPECTION

The inspection and banding of Alberta breeding turkeys has been completed. 2356 birds have been banded for 150 members. The turkeys were classified 127 A's; 1129 B's and 1100 C's.

An A grade is almost perfect weighing 25 lbs. or more for young toms, and 16 lbs. or more for young turkey hens.

The B grade may have little defects in plumage but weigh 23 lbs. for toms and 15 lbs. for young hens.

The C grades are good breeding specimens well proportioned weighing 20 lbs. or better for young toms and 13 lbs. or better for hens.

Turkey inspection in Alberta is undertaken by the Dominion Government in conjunction with the Alberta Bronze Turkey Breeders' Association. W. C. Lyle of Arrowwood is secretary-treasurer and salesman of the organization.

George Ross, Southern Alberta rancher, is advocating an interesting scheme for co-operative cattle feeding between ranchers and farmers of his district.

Under the plan the ranchers would furnish standard calves to irrigation farmers equipped to feed them during the winter months; the calves to be sold outright to the farmers or to be fed and marketed on some equitable basis worked out between two parties. "This split in profits could be arranged," said Mr. Ross to the Lethbridge Herald.

"The scheme would relieve stockmen of carrying feeder calves through the winter, and open up a new industry to farmers who often wish for more to do during winter months. Our farmers would get the calves right from their mothers with the bloom on them. The calves would go on feed in ideal condition.

"The farmers would have to build adequate shelter for calves and store up a variety of feed. They might mix their crops by raising sugar beets, oats, barley and alfalfa as calves require well chosen ration. With 25 or 50 of these calves, there would be nice profit.

"The feeding industry has never been developed in this region, but with abundance of cheap feed on the farms why should it not be developed? Why send feeders out of the country instead of finishing them at home?"

## MAN OF DESTINY

"What destiny awaits that young man, the Prince of Wales, who by some supreme gift of personality has won the hearts of the world? How will he shape up in the duties of king ship?"

This is the introduction of an article in the New York Times by Philip Gibbs. He continues:

"The young man has been adopted the world over as the Prince of Youth. And when he made that spectacular dash from central Africa to his father's bedside, all nations gave his progress first place. The American people did so. The Germans called him 'The Prince' as though he belonged to them. In France there is always a cheer when his face is flashed on the screen. He stands for modern youth, for sportsmanship, courage and high spirit, for chivalry and laughter. When tales are told of his wilfulness, the sternest old Puritan relaxes and says: 'Boys will be boys.'"

What is the secret of his spell? Heredity and perhaps experience. He has more than a touch of his grandfather, which enabled King Edward to break from the stifling influence of his early Victorian boyhood. But, back goes his hereditary chain to Bonnie Prince Charlie of Highland legends, and back again to Prince Hal who quaffed sack at midnight with Falstaff and ragamuffins. Back still farther to Edward of Crecy who took three feathers for his crest and won his spurs in France. By a trickle of blood those old ghosts live again in the young prince.

It was the Great War which developed his character. He was in France early as a "pup" lieutenant. Nobody bothered about him much. He was mostly unrecognized except by a few of us when he rode on a push bike along the roads of war.

Later with the Welsh Guards, he became a typical young subaltern. He was in the front line under shellfire, and missed death by a useful few inches without turning a hair.

It was in the war that he learned to laugh with that sudden rush of humor to his eyes, those little puckers about the lips. On one morning near the end when thrones were toppling and Kings were slipping off to exile, he came to the Guards mess and announced cheerily: "Crowns are cheap today, gentlemen."

Two or three days before the end of the war, the inhabitants of the town

where we were stationed emerged from their cellars into daylight. A girl presented flowers to this young Captain of our troop who was the Prince of Wales. He smiled and shifted from one foot to the other and blushed.

After the war he went visiting. He has a special fondness for his Canadian ranch, where he lives with simplicity, friendly with his neighbors, keen on a sing song or any kind of game.

This young man of destiny has nervous energy which he must liberate or choke. He must find outlet. He tires out his attendants. During his voyages, their great anxiety is to get him to bed at a decent hour. Their bones ached with deck games. At last he would yawn. Thank God for that. But after half an hour he would again reappear ready for a new lark. Inexhaustible.

The Duke of York cannot compete with his terrific energy. Few can.

He suffers real torture at these formal banquets. To sit still for three hours!

But he has a serious and even spiritual side. His intense allegiance to the Toc H is one example. He hunts up fellow members continually for chats.

He has no "side" unless people take advantage of his good nature. Then he can freeze them. He is most at home it is said, in a certain English family of no high rank or wealth, but of simplicity. This is his private paradise. The great worry of his devoted people is that when the crown is placed on his head, this Prince of Youth will be turned suddenly into a care worn man, bowed under boredom and ceremony. They would like him always to be the leader of sport and adventure, and to restore the spirit of enthusiasm for service and comradeship.

It is so difficult for a constitution King to use personal influence. He has to be careful not to step beyond his privilege.

Personally I believe that the Prince will never be reduced to a puppet. When the crown touches him, he will hold his head with high resolve and courage, letting slip the frivolity of youth, without losing humor. His energy will gain outlet in public service. As no other man in England he could speak words which would be like a trumpet call to the spirit of the young generation. As the world's favorite he has international influence for conciliation and peace.

## If I Owed You Two Dollars

For a year or more and made no effort to  
"settle up," you would make every effort  
to collect the two-spot whether it made  
me "mad" or not, would'nt you? And you  
would not be anxious to sell me anything  
more until I had arranged payment. Then  
suppose that in addition to me, Smith and  
Jones, and Bellamy, and Whosis owed you  
each \$2.00. Including my debt that makes  
\$10.00 coming to you and no one paying.  
each one of your debtors saying: "Why,  
it's only \$2.00, what's the hurry?—but  
when the \$2.00 is multiplied 5 times it's  
\$10, and when it's multiplied by hundreds  
it's a lot of money.

Subscribers to The Advocate number into the hun-  
dreds. Each receives The Advocate each week. The  
paper, ink and workmanship which enter into it are paid  
for every week. The subscriptions come due but once  
a year—Just \$2.00—multiplied by hundreds.

Will you remember that, please, when your "sub-  
scriptions" DUE notice arrives? Thank you.

"LOOK AT THE LABEL"

## HAIL LOSSES

According to the report of the direc-  
tors of the Hail Insurance Board of  
Alberta, the most extensive hail los-  
ses on the continent in 1928 were in  
Alberta. The heaviest losses were  
toward the end of July.

The worst hail year in Alberta was  
in 1927. The early part of the sum-  
mer of 1928 passed auspiciously. Dur-  
ing the first four weeks of July, it  
hailed on eighteen different days, but  
the storms were local with few claims.

On July 28, 29, 30, 31 claims were  
received from 65 municipal districts,  
which included 24 townships affected.  
It hailed on the nine following days  
and August 11 came the climax. This  
last storm started north-west of Olds  
in township 34. Another storm start-  
ing northwest of Ponoka took a strip  
southeasterly across the province.  
Each of these storms was 200 long  
and often 6 miles wide and took 100  
per cent. toll every foot of the way.  
Claims were received from 191 town-  
ships.

The one bright spot was that  
prompt service was given. When  
claims were entered from 241 town-  
ships these were cleaned up in 14  
days. When claims came from 191  
townships, it required only 10 days  
to adjust matters.

The outlook for the future is fair-  
ly bright insofar as municipal insur-  
ance is concerned. Because of the  
high rates charged in the last two  
years, and the high rates that com-  
panies would be forced to charge,  
some farmers claimed they could not  
afford insurance.

The fact remains that in consider-  
able portions of the province, it would  
be impossible to consider grain rais-  
ing without hail securities.

### JACK MINER'S APPEAL

Jack Miner's name is known where-  
ever an interest is taken in feathered  
creatures. His bird sanctuary was es-  
tablished in 1904, as a place where  
birds could find food, rest and protec-  
tion. It was four years before any  
wild birds accepted his welcome, but  
since then it has grown to undreamed  
of success. But with the success it  
has also become a financial burden,  
which Jack Miner cannot carry alone.  
During the last ten years it has cost  
between \$5000 and \$6000 a year to  
feed the birds. This has been financ-  
ed by lectures, donations from weal-  
thy friends, a \$400 grant from the On-  
tario government and a \$750 grant  
from the Dominion government. This  
is a more or less precarious way in  
which to gather the \$5000 which must  
be forthcoming and he asks the gov-  
ernment for a perpetual grant of  
\$5000 to pay for feed. He says nothing  
of the land, the buildings, equip-  
ment and labor. Surely this appeal  
will be granted—when one considers  
the many dubious ways in which  
public moneys are spent. Jack Min-  
er's sanctuary is the model on which  
the government's of the world have  
fashioned their bird sanctuaries. Rus-  
sia is the latest to follow in line, es-  
tablishing a series of bird refuges  
along Miner lines, and recently Uni-  
ted States legislature appropriated  
\$8,000,000 to conduct similar work  
through United States in the next ten  
years.

### A SUCCESSFUL STENO.

To become a good stenographer,  
you must be a girl with light, dark or  
red hair, permanently so, or rotate  
colors if desired. You must have a  
powderpuff, lipstick, eyebrow pencil,  
chiffon stockings, a note book which  
never opens at the right place, pen-  
cils always needing sharpening and  
an eraser which never can be found.

But first you should put in a couple  
of months at a business college where  
shorthand, typewriting, gold digging  
and sheiking can be picked up. After  
you have finished, you pick a boss  
who looks easy, as well as one who is  
easy to look at. The next step is to  
give all your friends and relatives  
your office telephone number, so they  
can call you up in office hours and re-  
lieve the tedium. A girl is entitled  
to pleasant moments.

Having now entered the business  
world it is your duty to arrange for  
yourself a schedule as follows:

A.M.—9.00—Time to sign in. 9.15  
—You arrive, and sign with a snappy  
alibi. 9.15-9.30—Dispose of hat, coat  
and gloves, don a sweater, and ar-  
range your hair. 9.30-9.45—Take a  
little dictation—as little as possible.  
9.45-10.15—Slip down and buy a choc-  
olate bar. 10.15-10.45—Call up the  
boy friend, and discuss the big time  
you had last night. 10.45-11.00—  
Make a date for lunch, and phone the  
house to ask what mail came for you,  
and if the cleaners sent home the  
dress you spilled the coffee on. 11.00-  
11.15—Write a letter or two, and a  
personal note. 11.15-11.30—Go out  
and get a drink of water. 11.30-11.45  
—Begin to get ready for lunch. 11.45-  
11.55—Powder, arrange hair, arrange  
hat, powder again and strut out. 12.00  
—Quitting gong rings.

Arrange the afternoon on similar  
lines. You will be a complete success.

Information has been received at  
Milo, that the C.P.R. plans at an early  
date to connect up the Milo extension  
of the Lomond-Suffield branch be-  
tween Lethbridge and Aldersyde. Just  
where the road will link up with the  
Aldersyde line is not known but may  
be Blackie.

## NEWS OF INTEREST

Clothes may make the man, the  
want of them, the flapper.

Gleichen has organized a Chamber  
of Commerce.

Prospective Purchaser: "I don't ex-  
actly like the looks of this car from  
the front." Salesman: "But look at  
the back." It looks good from that  
view, doesn't it?" "Yes, but—" "Well,  
that's all anybody'll ever see  
of this car."

The total collections under the In-  
come Tax Act for last year are some  
millions of dollars ahead of the year  
before, in spite of a ten per cent re-  
duction in the tax. Mr. Euler attrib-  
uted this increased collection to three  
things:

1. More efficient methods of col-  
lection.
2. The increased prosperity of the  
country.
3. Advertising.

### BOTTLE BABIES

An "orphan" lamb is a tricky baby  
to bring along. A new born lamb  
needs a tablespoonful or two of milk  
every hour or two for the first three  
days, night and days. Gradually the  
amount of milk is increased and the  
intervals between feedings lengthened.  
The rubber nipple and the bottle  
should be clean and sterile. Soon a  
lamb may learn to drink from a dip-  
per.

If bowel derangement starts give a  
small dose of castor oil, reduce the  
milk and add lime water at the rate  
of one ounce per pint of milk. Milk  
rich in butterfat should be used and  
the milk should be taken from one  
cow for the first three weeks.

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of Charles Fitzpatrick,  
late of Reid Hill, Alberta, Deceased:

NOTICE IS HEREBY GIVEN that  
all persons having claim upon the  
estate of Charles Fitzpatrick, De-  
ceased, who died on the 13th July,  
1925, are required to send to the un-  
dersigned Executrix of his will by the  
30th day of April, 1929, a full  
statement, duly verified, of their  
claim, and any securities held by  
them, and that after that date the  
Executrix will distribute the assets  
of the deceased among the parties  
entitled thereto, having regard only  
to the claims of which notice has  
been so filed, or brought to her  
knowledge.

DATED this 6th day of March,  
A.D. 1929.

L. H. STACK,

Solicitor for

Johanna Charlotte Fitzpatrick,

# Vulcan Herald

VOL. 1. VULCAN, MARCH 21, 1929 No. 51

## Vulcan Herald

Published in the interests of the People of Vulcan and the Farmers of the District.

J. T. WILLARD, Editor.

### A HELPFUL HINT

Collect your soft, clean wood ashes, and put them in a large shallow box, so on sunny days your chickens may dust in them. If you will brown and crush egg shells and sprinkle these in the ashes, the hens will scratch busily after them. In winter chickens have no opportunity to scratch the soft earth and resent the frozen garden that keeps them from dusting.

### GEOGRAPHY —?

A teacher of geography asked little Johnnie if he knew how many poles there were. Whereupon Johnnie replied: "No ma'am but 17 lives next door to us."

The real definition of "Adamant" was originally, "Adam's Aunt" meaning a hard, tough character.

A spring-trip hitch on a tractor plow is like an insurance policy. They both protect you against loss.

The hitch on the McCormick-Deering No. 1 Little Genius is a spring-trip type and it comes as regular equipment. Many plows do not come equipped with this essential device. The spring-trip will protect you against damage to the beams or bottoms should a hidden root or stone be encountered.

Time and tide wait for no man, but time always stands still for a woman past thirty.

Brevity is the soul of wit—and the charm of women's skirts.

Big-mouthed bass aren't any more so than a certain proportion of those who catch them.

Sometimes when we get a little discouraged, as all mortals do, some good friend drops in and says "My McCormick Deering is the best I ever used," and all our troubles are forgotten.

### DEPENDABLE WAY

The coming crop drops through the boots of your grain drill. A good deal depends on the way it is dropped. You eliminate all possible risk of uneven sprouting and ripening if you will use McCormick-Deering Front Seed Delivery Drills.

Some men may be able to read their wives like a book, but can they shut them up so easily.

VULCAN

Good Equipment Makes a Good Farmer Better.

### THAT MISTAKE

If a doctor makes a mistake he buries it; if a merchant makes a mistake, he need never tell it; but if an editor makes a mistake, he puts it on a large sheet of paper for the world to look at, and all the cranks in the country have something to wag their jaws about for a month—Petrolia Advertiser

### CANADA'S ODD FACTS

Three hundred whales are caught annually in the Canadian Pacific waters.

Two hundred thousand passengers went to Europe in 1928 by the St. Lawrence route.

Forty-three countries were represented in 1928 naturalizations.

There are 272 millionaires in Canada.

There are 2.41 people to every square mile.

Three and a half billion cigarettes were made in the Dominion last year.

Three and a quarter million cows supplied us with milk.

Twenty million pounds of wool were taken from Canadian sheep.

Canada imported last year \$30,000,000 worth of whiskey; \$5,500,000 of butter; \$34,000,000 of fruits; \$18,000,000 of tea.

## TITLED FARMERS

The disclosure that the Earl of Egmout has long been living as a humble "Alberta farmer, and is not at all sure that he will prefer the House of Lords, calls the attention of a title loving democracy to the nobility scattered through Alberta.

Heading the list is the Prince of Wales who is sometimes here, and maintains constant touch with his ranch.

The Earl of Minto still retains his holdings.

The Duke of Sutherland helped to make the Brooks' district known for alfalfa.

Lord Rodney is settled in northern Alberta and has developed a fine farm. Not only that, but he has established a training school for such students as Lord Edward Montagu and the Hon. George Stanley, nephew of the Earl of Derby.

Another British peer settled after the war, near Alix.

Prince Eric of Denmark at one time farmed in Alberta.

Baron Joseph Casavossy and his brother Andre are in Southern Alberta.

Count de Foras was a pioneer of the High River district.

Every land owner in Western Canada is king of his little kingdom. No wonder he hesitates between a foothill ranch and a seat in the House of Lords.

## PHOSPHATES

An article in a recent Country Guide discusses the use of super phosphates for fertilization, without being able as yet to reach a positive decision as to the value.

The great appeal of Western soil has been that it is rich beyond dreaming, that it can produce crop after crop without diminution of its wealth. As yet, there is little indication that the soil is not producing as well ever. On the other hand there is a chance that with the stimulant of artificial fertilizers it might be still more productive. Australian farmers situated in a country with limited rainfall, find superphosphate a wonderful aid.

There are ten chemical elements required for growing crops. Three are in the air and rain. Four more are usually present in superabundance in the soil. The other three—nitrogen, phosphorous and potassium—must be provided as the ground wears out. Nitrogen produces rank growth but retards seed development. Phosphorus increases proportion of seed to straw and hastens development. Potassium promotes food storage underground. Farmers of other lands use all or some of these three, as their needs demand.

Superphosphate appears to be the answer to western problems economically and practically, and is waiting the result of some years' trial.

Our superphosphate is available from B.C. Down in the south-east corner of B.C. is the biggest lead smelter of the world. S. G. Blaylock one of the engineers, finally conceived the idea of using the sulphur fumes that pour from the smelts, in combination with the mountains of phosphate rock that stand adjacent. Sulphur, phosphate and brains have produced the super phosphate now available. This may be laid down at prairie points for \$40 a ton.

In the experiments of Mr. Hut ton of the C.P.R., a wide variety of wet and dry conditions, etc., have to be regarded. From some trials, the records show little difference. The best record comes from Matthews of the Scott, Sask., experimental farm:

"Difference in health and vigor of plants were in evidence shortly after emergence. From the superphosphate treated plots on summerfallow a pronounced beneficial effect was noted in milling and baking result. These effects were shown in color and volume of loaf, as well as percentage of protein."

In north-western Saskatchewan crops are late in maturing. There appears to be a deficiency of an important soil condition. Superphosphate may be the solution to this problem. Nitrogen or potash alone do not materially affect the yield. But in all plots where superphosphate is used alone or in combination, an increased yield has always been obtained.

A few seasons more of trial will place definitely the value of this cheap and available fertilizer. And the experiments are being followed with close interest by all farmers of Alberta.

## NEWS OF INTEREST

A C. P. R. station will be built at Mazeppa this year.

A garlic eating contest was staged in Memphis, Tennessee—and not any too far away at that.

The honeymoon is that part of a girl's life that comes between the lipstick and the broomstick.

As soon as a man thinks he has a woman "just where he wants her," he begins to wonder if he wants her there.

The oil speculations which are at such a heat in Calgary, are resulting in the purchase of many new cars. Car dealers are reaping the benefit of the boom in many instances.

To meet increased freight and passenger traffic on the waters of the Pacific coast, two new vessels of the "Princess" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific, it is announced by Captain C. D. Nerouts, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 430 passengers.

Canadians are the world's greatest telephone conversationalists. A recently issued official bulletin dealing with telephone statistics discloses that on a per capita basis an average of 221 conversations per year were held by the people of Canada, compared with 205.4 in the United States, the next highest, and 137 in Denmark, which is given third place. The bulletin shows there were at the end of 1927 a total of 1,259,987 telephones in Canada, an average of about one phone for every eight persons in the Dominion.

The fur trade is an industry of growing proportions in Brandon, the shipments of pelts out of the province of Manitoba having placed the city of Brandon in a most favorable position. While no precise record is kept of the number of pelts obtained and sold within the province, there is a royalty paid on each skin shipped out of the province, and from figures compiled, it is noted that there were 19,746 muskrat pelts shipped out of the city to the markets of the world. In addition there were 2,221 weasel pelts, 737 wolf pelts, 546 badger, 17 red fox and 11 silver fox, as well as 245 pelts of other animals including rabbit, skunk, otter and beaver.

## INTERESTING NEWS

Issued by the Publicity Commissioner  
Department of Agriculture, Ed-  
monton, March 16, 1929

### Farm Training for Young Boys

The first group of fifty British boys coming to Alberta during the coming spring under the arrangement between the Provincial Government and the Overseas Settlement Board will arrive in Edmonton about March 28th. The boys will be given a month's course of training at the Provincial Schools of Agriculture at Olds and Vermilion before being placed in employment on farms in the province. A second group will arrive about May 1st and will be similarly trained and placed in farm work.

Parties of young British women are expected to arrive about June 1st or July 1st. They will be given a month of instruction which will fit them to fill positions as domestic farm help throughout the province.

Both boys and the girls coming forward under this arrangement have been selected through the office of Herbert Greenfield, agent general for Alberta in London. They are said to be of the type most likely to be readily adaptable to conditions in Western Canada, many of them already having had experience in farm work.

**Alberta Flier Wins Dominion Trophy**  
The McKee trophy awarded for the most meritorious flying done in Canada in 1928 has been won by Lieut. C. H. Dickens of Edmonton, Special mention is made in awarding this honour to Lieut. Dickens, of his flight to Fort Good Hope, he crossed the Arctic Circle and has since returned to Edmonton from where he is engaged in making regular flights into the far north.

### Irrigated Lands

A marked activity in land sales in the Brooks district is reported by D. H. Bark, Superintendent of the C.P.R. Demonstration Farm at Brooks. Mr. Bark states that more new settlers are coming into the irrigation district this year than the total of the movement during the past five years. The majority of the western and central states.

### Muskies Shipped to England

Ten pair of live muskies were shipped from Edmonton during the past week to England. This shipment the first of its kind to be made from western Canada, will form the nucleus of breeding stock for a large English fur raising concern. The shipment was made by A. C. McFayden, who states that if this trial proves successful, several thousand more rats will be shipped through the next few months. Further evidence of the rapid growth of this industry is given by orders for breeding stock which Mr. McFayden has recently received from Czechoslovakia.

### C.N.R. Appoints Industrial Agent

Robert Henderson who for the past eight years has been connected with the District Engineer's Branch in Edmonton has been appointed Industrial Agent for the Alberta lines of the Canadian National Railways. The action of the C.N.R. in making similar appointments in the three prairie provinces reflects the increasing interest being taken by eastern firms in the commercial and industrial development of the West.

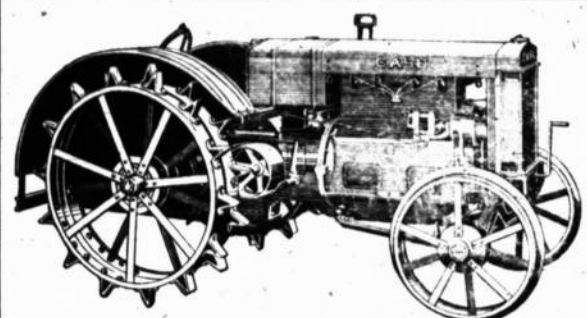

### May Have Fish Hatchery

Further experiments will be carried on during the coming summer at Cold Lake to determine whether a fish hatchery can be satisfactorily established at that point. With the new hatchery at Waterton Lakes in operation this year the capacity of hatcheries in the national parks in Alberta will be 3,200,000 fry in a season. Large numbers of these are set out annually in the rivers and lakes of the province in order to maintain and increase the supply of game fish.

### AN AMAZING AGE

We are living in wonderful times it is well-called the amazing age. The tale of aladdin and his lamp no longer excites, for that mystic could have done no better than has been done by man in recent years. The radio, air mail, freight and express by air routes to all parts of the world, talk of airports as of railway stations, telephone talks to remote corners of the earth, the manufacture of oil from gas, claspboards from cornstalks, rubber, paints, paper and stockings from wood, and food plucked from the air—These are just a few of the wonders of the age. In the conquest of the physical world man is now standing at the topmost pinnacle. As wonderful as has been man's conquest of the physical, his treatment of the economic value in life is no less real—they, too, belong to the forefront of the picture. There have been great co-operative efforts carried out and yet individualism has been preserved. In no age of civilization have there been so many agencies for the development of home life and the protection of the household against the ravages of disease, disaster or death. At no time of the world have there been so many men and women interested in the welfare of the people.—Petrolia Advertiser.

A talking marathon was held recently in which a young woman talked for 50 hours and then had to quit because of swollen ankles. There seems to be a lesson in this somewhere.

## The New Model L Case Tractor

Utmost in dependability of performance, durability of construction and economy of operation.

# Spring

Grandmother was a wonderful housekeeper in her day and generation. Every Spring, up came the carpets; down came the pictures and heavy lambrequins; out went the furniture, and in came soap and water and scrubbing brush. Soon the floors and woodwork gleamed like new; the carpets were replaced after a beating that sent every particle of dirt swirling away in a cloud of dust; the furniture was cleaned and returned to its accustomed place. Everyone was miserable, including grandmother—but it simply had to be done.

Women are better housekeepers than grandmother ever was or ever could be for they have the modern conveniences to make them so. They have learned, through advertising, of the many utensils that make housework lighter and do it better. They have learned, through advertising, of better foods and how to prepare and serve them more attractively, the many time and labor saving devices that we have come to regard as every day necessities.

Because of advertising, women have more time for relaxation and the social amenities—They look younger—They are younger—by years—than grandmother at the same age. Advertising has made that possible.

Read the advertising and stay young.

### PITHY PARAGRAPHS

To call a man half-witted does not always tell the story. There are much smaller fractions than a half.

So live that you don't need to coach the children in good manners before they leave for a party.

There are now 5,500,000 flourishing tree plantations scattered over the prairie provinces where in former times miles of travel would not reveal a tree.

A back woods man, in New York for the first time, went to abig hotel for dinner. As an appetizer, the waiter brought a tray of large olives. The stranger eyed them for a while, then motioned for the waiter. "I don't like to trouble you," he said, "but if you wouldn't mind I'd like to see one of the pods those green peas came in."

### C.G.I.T. CONFERENCE HERE

(Continued from Front Page)

at the disposal of the girls for their recreation period Saturday afternoon under the direction of Miss Holmes of Vulcan.

The Conference banquet was held in the L.O.O.F. hall in the evening. The ex C.G.I.T. acting as waiters. The evening programme opened with a toast to the King, proposed by the President, Mable McPherson, and followed by a lively sing song and contests which the girls found interesting and amusing. A selection from the girls orchestra and quartette by the local girls were very beautifully rendered. Addresses were given by Ruby Woolridge of Blackie, Ena Gill of Champion and Florence Gold of Vulcan, representing the various groups. Greetings from the Rev. J. N. Brunton and a most touching appeal by Miss Hilton "Pilgrims All" brought a most delightful evening to a close.

There was a capacity house at the Sunday morning service which was in charge of the Vulcan girls. Edna McPherson presided and the anthem, girls' quartette, readings by Marion Hartford and Ruth McKay, prayer by Charlotte Burrows and the address by Miss Nix was in keeping with the spirit and dignity of a religious service. To those who were privileged to attend, that service will ever remain a vivid memory. From the very beginning the girls created an atmosphere of worship that was present throughout the whole service.

Miss Nix in a stirring address dealt with the aim and purpose of a Canadian Girl in Training viz: To cherish health, to know God, seek truth, and serve others and thus with His help become the girl that God would have her to be. No Canadian Girl in Training who listened to that address could help but be thrilled at her privilege to be alive in such an age of opportunity and responsibilities that are hers if she is fully alive to it and give to it.

The closing session, Sunday afternoon from 3 to 4 was most impressive. After a service of worship and a closing address from Miss Nix on the "Dauntless Pilgrim" the girls formed a friendship circle, repeated the C. G. I. T. purpose and singing together "Follow the Gleam." The delegates then returned to their homes proud of being a Canadian Girl in Training.

At the evening service the church was crowded to the doors to hear Mr. Cecil Brown's message to the boys and girls. After dealing with the problems that are facing the youth of today, the speaker declared that Jesus Christ has always been the pattern held before the boys and girls by the church and today there is no change. Mr. Brown has every confidence in the boys and girls of today and that they will respond to the appeal of the Cross if we only give them a chance. Special music by the choir including the excellent rendering of "There is a Green Hill Far Away," together with violin solos by Mr. Bird, the choir leader, added much to an enjoyable service.

### WARNINGS RE TARIFF

Eastern papers have taken note of Herbert Hoover's remarks in his inaugural address, in which he referred to a need for tariff revision to help the farmers of the Republic. This is generally understood as meaning that tariff will be increased on Canadian farm products, and many articles are being written warning the farmers of Canada to get their houses in order from a marketing standpoint. The Dominion Government is called upon to face the situation flatly. Agriculture is one of the greatest industries of our country and steps should be taken to prevent any cramping of it.

### STANDARD BOTTLES

The Department of Trade and Commerce has issued an order in council regarding glass bottles used by oil stations and garages. So many different styles are in use, with varying measurements, that the following order will be effective after March 31: "Bottles used as measures for the sale of oil shall be made of clear, uncolored glass and cylinder in shape. The capacity line is clearly defined and is not to exceed one ten inch in width. The capacity of the bottle shall be clearly shown and the bottles shall bear the name or mark of the company, responsible for their use and distribution."

### ADDITIONAL LOCALS

Activities in oil stocks are attracting Vulcan people to Calgary, among them being Messrs. A. Mutz, W. Peterson, L. H. Stack, A. J. Flood, R. L. Elves and Dr. Barker.

Vulcan Lodge, No. 21, B.P.O.E., will be "At Home" to members and invited guests, in the L.O.O.F. hall, tomorrow, Friday evening.

### MISTAKEN IDENTITY

The dairy maid put on her coat, and went to milk the family goat. She tried and tried, and then she cried "Be still Nanny, be still!" The poor goat sighed—and then replied "This ain't Nanny! It's Bill!" Now you tell one.

### C. C. REBBE'S SALE CALENDAR

Combination Sale at rear of Dodds' Livery Stables, Saturday, March 23rd.

Harry Adams' Sale of farm implements etc., Monday, March 25th, N.W. 30-16-24.

Mrs. Harry Johnston's Sale of farm stock, implements, and etc., on Tuesday, March 26th, N.W. 26-18-24-W4; 11 miles north and 2 miles east of Vulcan.

Noah Bechtel's sale of farm stock and implements on Wednesday, March 27th, at his premises 12 miles east and 3 miles north of Blackie, 15 miles south-west of Arrowood, and 17 miles north and 3 miles west of Vulcan.

Watch for future sales dates.

### HIGH SCHOOL LITERARY SOCIETY

The monthly meeting of the High School Literary Society was held on Friday, March 1st in the Vulcan Theatre. The meeting was opened by singing O Canada. This was followed by a most enjoyable piano solo by Charlotte Burrows. The next item was a debate with the following resolution: "The present system of immigration in Canada be abolished." Supporting the affirmative were Marian Hartford and Barbara Howes; the negative, Harland Schenck and Earl Shaw. The affirmative was successful in upholding the resolution. The High School paper was read by Harriet Discher. Following this was a chorus by the Grade IX girls which was enjoyed by all. The last item was a piano solo by Allan McAskill which was very well received. The meeting was closed by singing God Save the King.

### UNION JACK NEWS

There will be a dance at the Union Jack schoolhouse Monday night, April 1st under the auspices of the Eastway W.I. Another feature of the evening will be a quilt raffle. Be sure and get a ticket. Everybody welcome.

Mrs. N. Johnson was sent as official delegate to the W. I. District Conference held at Medicine Hat and reports a very enjoyable time.

The Eastway Institute members have been entertaining at a series of whist drives this winter. The next one will be held at the home of Mr. and Mrs. G. Ryan, Thursday evening, March 21st.

The St. Patrick's dance held last Friday night was a huge success. The weather being favorable permitted a large attendance and with fortunes and novelties and the best of music, everybody enjoyed themselves to the fullest extent.

Seven C. G. I. T. girls from the Willing Workers group, attended the C.G.I.T. Conference at Vulcan. They all report a very interesting and enjoyable time.

Much credit is due to the leaders, also the Vulcan groups and helpers for their wonderful hospitality and splendid entertainment.

A play entitled "Finnigan's Fortune" will be staged by the young people of the community at the Union Jack school, March 28. Here's a treat real side-splitting farce from beginning to end. Dance afterwards. Don't miss it.

Messrs. James and Frank Wyatt left by car for Saskatchewan where they will visit with their aunt and uncle for a time.

When a fine husky cow belonging to C. Hanson, Innisfail, Alberta, just walked out on him and died, Mr. Hanson groaned in spirit at the sudden loss of ninety dollar's worth of good cow. But he bethought himself of a method of gathering in a little money on her. He cut up his faithful bovine, sprinkled the chunks with a shot of strychnine, and spread her all over the adjacent landscape where coyotes were wont to rove. Then in a couple of days he drove round and collected enough dead coyotes to more than pay him for the \$90.00 cow.

### TRADE WITH JAPAN

It was no false move on the part of the government to appoint an envoy to Japan. Yearly our trade is increasing with that country, with ever expanding possibilities. Canada's purchases from Japan are for the most part, silk, tea, electric lamps, Japanese oranges and rice. The Dominion's exports are more diversified, the principal items being wheat, wheat flour, fish, logs, wood pulp, aluminum and manufactures of nickel and zinc. The most significant trade is in wheat and flour. In 1918 Canada made her first shipment—exactly eight bushels. Since then, Japan has turned increasingly from rice, favoring Canada's hard wheat. In 1928 exports of wheat were 9,919,849 bushels. Japan has shown strong disposition to increase the variety of her purchases, and is investigating dairy beef cattle, horses, swine and sheep. Western Canada will be particularly favored, as being in closer touch. She has merely to be shown.
